To whom it may Concern:

I am pleased to recommend to you the audio/visual sound selection services provided by Mr. Don Barber.

We employed him in the summer of 2008 to advise us on the selection of a sound amplification system for our boardroom.

It was a project that entailed selecting a new system that would operate in a newly constructed boardroom environment and interface with an aging, limited phone system. The audience that it had to meet the needs of is a highly sophisticated group of professional volunteers and donors. We had limited budget dollars and limited internal expertise. Because of previous issues, we could not afford to get it wrong.

Don came in and assessed the situation, worked closely with our construction and IT staff to organize vendor requirements and review and select a suitable system and vendor.

Don oversaw the installation and tuning of the system and training of our staff.

We have been highly satisfied with the system itself and with our experience in working with Mr. Barber.

Yours truly,

Catherine Smith
Chief Operating Officer
